CLAIM AMENDMENTS:

Please make the following changes to the claims:

- 1. (Currently Amended)** A water and oil emulsion composition for making up the eyes and skin comprising a water phase, an oil phase, at least one silicone resin film forming polymer and at least one film forming polymer ~~which is~~ selected from the group consisting of (i) a copolymer of silicone/acrylate copolymer and ethylenically unsaturated monomers; (ii) a vinyl/silicone copolymer, (iii) ~~polymer comprised of polymerized ethylenically unsaturated monomers; and a silicone polymer;~~ and (iv) mixtures thereof; and at least one organic pigment in an amount of at least about 0.1-95% by weight of the composition wherein said organic pigment forms the main color component of the composition, said composition being free of inorganic pigments, ~~wherein the viscosity of the composition is about 1,000 to 500,000 centipoises at 25° C,~~ and the composition contains about 0.1-95% by weight water and 0.1-99.9% by weight oil.
- 2. (Original)** The composition of claim 1 which is a water-in-oil emulsion or an oil-in-water emulsion.
- 3. (Original)** The composition of claim 1 wherein the organic pigments are soluble in the water phase.
- 4. (Original)** The composition of claim 1 wherein the organic pigments are dispersible in the oil phase.
- 5. (Previously Presented)** The composition of claim 1 wherein the at least one organic pigment is a D&C color, FD&C color, or Lakes of D&C or FD&C color.

Scancarella et al.

6. (Previously Presented) The composition of claim 5 wherein the at least one organic pigment is selected from the group consisting of red, green, blue, yellow, violet, orange, and mixtures thereof.
7. (Previously Presented) The composition of claim 1 which provides a black or dark brown color to the eyes or skin to which it is applied, and said color is achieved by combining organic pigments selected from the group consisting of red, green, blue, yellow, violet, orange, and mixtures thereof.
8. (Previously Presented) The composition of claim 6 wherein the red pigment is selected from the group consisting of monoazo, disazo, fluoran, xanthene, or indigoid pigment.
9. (Original) The composition of claim 8 wherein the red pigment is a monoazo pigment or salt thereof.
10. (Previously Presented) The composition of claim 6 wherein the green pigment is a selected from the group consisting of triphenylmethane, anthroquinone, or pyrene.
11. (Original) The composition of claim 10 wherein the green pigment is an anthroquinone pigment or Lake thereof.
12. (Previously Presented) The composition of claim 6 wherein the blue pigment is a triphenylmethane pigment.
13. (Previously Presented) The composition of claim 6 wherein the yellow pigment is selected from the group consisting of pyrazole, monoazo, fluoran, xanthene, or quinoline.
14. (Original) The composition of claim 13 wherein the yellow pigment is a pyrazole.
15. (Original) The composition of claim 1 wherein the oil phase comprises one or more volatile components.

Amendment

Filed: May 29, 2001
Scancarella et al.

16. (Original) The composition of claim 15 wherein the volatile components are silicones, hydrocarbons, or mixtures thereof.
17. (Original) The composition of claim 16 comprising about 5-85% by weight of the total composition of one or more volatile components.
18. (Currently Amended) The composition of claim 1 wherein the silicone/acrylate the film forming polymer is poly(dimethylsiloxane)-g-poly(isobutylmethacrylate) ~~a polymer comprised of polymerized ethylenically unsaturated monomers; or a silicone polymers.~~
19. (Currently Amended) The composition of claim 1 wherein the silicone/acrylate film forming polymer is poly(isobutyl methacrylate-co-FOSEA)-g-poly(dimethylsiloxane) ~~a copolymer of silicone and ethylenically unsaturated monomers.~~
20. (Currently Amended) The composition of claim ~~119~~ wherein the silicone resin film forming polymer is trimethylsiloxysilicate, diisostearoyl trimethylolpropane siloxysilicate, diilauroyl trimethylolpropane siloxysilicate, or mixtures thereof ~~a silicone acrylate copolymer.~~
21. (Previously Presented) The composition of claim 1 which is an eyelash color, eyeliner, composition for coloring eyebrows, facial or body tattoo, or lipcolor.
22. (Canceled)
23. (Previously Presented) The composition of claim 1 further comprising a plasticizer in an amount sufficient to improve spreadability and application of the composition when used to make up the eyes or skin.
24. (Original) The composition of claim 23 wherein the plasticizer is present at about 0.01-20% by weight of the total composition.

Scancarella et al.

25. (Original) The composition of claim 24 wherein the plasticizer is a glycerol, glycol, or citrate ester; or an ester of adipic or malic acid.
26. (Previously Presented) The composition of claim 1 further comprising one or more viscosity modifiers which increase the viscosity of the composition.
27. (Previously Presented) The composition of claim 26 wherein the viscosity modifier is present at 0.01-60% by weight of the total composition.
28. (Previously Presented) The composition of claim 27 wherein the viscosity modifier is selected from the group consisting of natural or synthetic montmorillonite minerals, associative thickeners, silicas, or silicates.
29. (Previously Presented) The composition of claim 28 wherein the viscosity modifier is a natural or synthetic montmorillonite mineral reacted with a quaternary ammonium compound.
30. (Currently Amended) A water and oil emulsion composition for making up the eyes or skin comprised of a water phase and an oil phase; at least one film forming polymer which is a silicone resin and at least one film forming polymer that is a silicone/ acrylate or vinyl/silicone copolymer, selected from the group consisting of (i) a copolymer of silicone and ethylenically unsaturated monomers; (ii) a polymer comprised of polymerized ethylenically unsaturated monomers; (iii) a silicone polymer; and (iv) mixtures thereof, at least one organic pigment, which is present in an amount of at least about 0.1-95% by weight of the composition, and at least one inorganic pigment which is present in an amount of at least about 0.001-15% by weight of the composition, wherein the at least one organic pigment and the at least one inorganic pigment are dispersed in the oil phase and the organic pigment forms the main color component of the

composition, wherein ~~the viscosity of the composition is about 1,000 to 500,000~~
~~centipoises at 25° C, and~~ the composition contains about 0.1-95% by weight water and
0.1-99.9% by weight oil.

31. (Original) The composition of claim 30 wherein the organic pigments are D&C
colors, FD&C colors, or Lakes of D&C or FD&C colors.

32. (Original) The composition of claim 31 wherein the organic pigments are Lakes of
D&C or FD&C colors.

33. (Previously Presented) The composition of claim 30 wherein the inorganic pigment
is coated with silicone, lecithin, mineral oil, amino acids, or mixtures thereof.

34. (Original) The composition of claim 30 wherein the film forming polymer is
soluble or dispersible in the oil phase.

35. (Original) The composition of claim 30 wherein the film forming polymer is
soluble or dispersible in the water phase.

36. (Original) The composition of claim 30 wherein the oil phase comprises one or
more volatile components.

37. (Original) The composition of claim 36 wherein the volatile components are
silicones, hydrocarbons, or mixtures thereof.

38. (Currently Amended) The composition of claim 30 wherein the film forming
polymers are trimethylsiloxysilicate and a silicone/acrylate copolymer ~~is a copolymer of~~
~~silicone and ethylenically unsaturated monomers; a polymer comprised of polymerized~~
~~ethylenically unsaturated monomers; or mixtures thereof.~~

Scancarella et al.

39. (Currently Amended) The composition of claim 38 wherein the silicone/acrylate film forming polymer is poly(dimethylsiloxane) -g- poly(isobutyl methacrylate) a copolymer of silicone and ethylenically unsaturated monomers.
40. (Currently Amended) The composition of claim ~~38~~ 39 wherein the silicone/acrylate film forming polymer is poly(isobutyl methacrylate-co-methyl FOSEA)-g-poly(dimethylsiloxane) a silicone acrylate copolymer.
41. (Previously Presented) The composition of claim 30 which is an eyelash color, eyeliner, cosmetic composition for coloring eyebrows, a facial or body tattoo, or a lip color.
42. (Previously Presented) The composition of claim 30 further comprising a plasticizer in an amount sufficient to improve spreadability and application of the composition when used to make up the eyes or skin.
45. (Previously Presented) The composition of claim 30 further comprising one or more viscosity modifiers which increase the viscosity of the composition.
46. (Previously Presented) The composition of claim 45 wherein the viscosity modifier is present at 0.01-60% by weight of the total composition and comprises natural or synthetic montmorillonite minerals, associative thickeners, silicas, or silicates.
47. (Previously Presented) The composition of claim 46 wherein the viscosity modifier is a natural or synthetic montmorillonite mineral reacted with a quaternary ammonium compound.
48. (Currently Amended) A water and oil emulsion composition for making up the eyes or skin comprised of a water phase and an oil phase, at least one silicone/acrylate or vinyl/silicone film forming polymer, and at least one silicone resin ~~which is selected from~~
